Bathroom Accessories, Faucets, and Shower Plumbing

SANTEC
FLUID IMAGINATION

Affordable Luxury

Quality Plumbing Fixtures Made of Solid No Lead Brass
European Valves
Solid Metal Pop-Up Assemblies
Stainless Steel Flex Hoses
No Set Screws on Handles
Shipped Pre-Assembled in the Box for Hassle Free Installation
Designed and Engineered in the USA

For your convenience, these products are stocked in our Central Service Center. Orders placed before 2pm are available within 1 business day for MD, VA, and Raleigh NC locations. Greensboro NC ships within 48 hours.
WARNING: Do not clean your SANTEC product with ammonia (window cleaner), bleach, acids, abrasives, harsh polish, harsh cleaners, a coarse surfaced cloth, coarse sponge, or any type of scouring pad. Doing so may ruin your faucet finish and/or void the warranty.

Thank you for making SANTEC a part of your lifestyle and luxury spa experience. Our products have been created as works of enduring quality and sophisticated design. Luxurious finishes need proper care and attention, so in order to understand how to properly clean your distinctive luxury finish, please refer to the finish care information below:

Your SANTEC product can be identified in one of two categories: clear coated finishes or non-clear coated finishes. Clear coated finishes are more scratch-sensitive and are more reactant to harsh cleaning chemicals than non-clear coated finishes. Once you have identified the specific luxury finish of your SANTEC product, please follow the important corresponding care instructions.

Clear Coated Finishes
We recommend that all faucets, drains, etc., be gently wiped dry with a soft cloth after use to avoid water spotting and water deposit build-up. A mild liquid hand soap may be used occasionally if desired. Use of a non-abrasive carnauba wax will add protection to the finish and should be used if the faucets will not be dried after use. Santec Orobrass kitchen products are clear coated. For clear coated finishes, it is recommended to clean your product weekly with a soft moist cloth.

Non-Clear Coated Finishes
We recommend that all faucets, drains, etc., be gently wiped dry with a soft cloth after use to avoid water spotting and water deposit build-up. A mild liquid hand soap may be used occasionally if desired. Use of a non-abrasive carnauba wax is occasionally required and will add protection to the finish if the faucets will not be dried after use.

SANTEC is committed to enhancing your bathroom experience by creating luxury products that will provide enduring satisfaction. Every effort has been made to satisfy the highest standards of design and production, to create lasting peace of mind for our customers. We provide the following limited warranties on our products:

- Lifetime Warranty on Polished Chrome, Polished Nickel, and Satin Nickel Finishes
- 10 Year Warranty on Matte Black Finishes
- Lifetime Warranty on Cartridges
- 10 Year Warranty on Parts

Thermostatic Systems Examples with Rough-In Valve Options

SATH-8010 (1-Way / Non-Shared)
SATH-8210 (2-Way / Non-Shared)
SATH-8310 (3-Way / Non-Shared)
SATH-8212 (2-Way / 1 Shared)
SATH-8313 (3-Way / 2 Shared)
Thermostatic Valve Installation Instructions

**TH-8000 / TH-8200**
- Rough in the valve, lining the surface of the finished wall to the mudguard min/max line.
- Place #3 plate up against finished wall over valve.
- Screw all thread extension #4 onto the volume control / diverter valve until it stops.
- Mark #4 to the surface of the plate.
- Remove it and cut off excess thread extension.

**TH-8202 / 8300 / 8303**
- Once #4 is cut to the surface, insert #5 broach extension.
- Mark to surface of plate #3, remove and cut off excess broach extension.
- Re-install parts #4 and #5.
- Place plate #3 on the finished wall.
- Install #6 diverter ring. (Making sure the OFF position faces the 12 o’clock position.)
- Hand tighten On/Off handle assembly #7 to all thread extension #4 until flush against #6 diverter ring.
- Note: Make sure lever is pointing to the 12 o’clock position.

**Step 4**
- Place plate #3 on the finished wall.
- Install #6 diverter ring. (Making sure the OFF position faces the 12 o’clock position.)
- Hand tighten On/Off handle assembly #7 to all thread extension #4 until flush against #6 diverter ring.
- Note: Make sure lever is pointing to the 12 o’clock position.

**Step 5**
- Screw on threaded sleeve #11 onto thermostatic valve. Tighten all the way. The top of #11 threaded sleeve should be aligned to the bottom of #17 temperature restrictor.
- Hand tighten thermostatic flange #12 to threaded sleeve #11. Make sure #12 is flush against finished wall.
- Insert broach extension #10 onto thermostatic stem.

**Step 6**
- Insert teflon washer #13 to bottom of #14.
- Insert the thermostatic dial #14 with the 100° pointing to the 12 o’clock position over the extension broach #10.
- Secure with the provided long screw #15 and cut excess length to fit.
- Assemble the thermostatic handle #16 onto the thermostatic dial #14 and tighten with the set screw #9.
- Note: Make sure the lever is pointing to 6 o’clock position.
