

QuickSHIP

ceramic / porcelain

Table of Contents

For your convenience, the products shown in this catalog are all stocked in our Central Service Center.
Orders placed before noon are available within 1 business day.

Series with this symbol meet the requirements for the Build America, Buy America Act (BABA).

The TCNA recommends rectangular shape tile be installed with a maximum of 33% offset in order to resolve any possible lippage from one tile to the next.

Prices subject to change.

ADJUSTABLE PEDESTALS

FOR RAISED INSTALLATION

A wide range of features such as the noise-reducing rubber head, the Adjustment Key, a wide range of adjustable heights and the pre-cut base for wall corner cuts, make the NM pedestal perfect for any kind of raised flooring applications. Featuring an above average loading capacity and a reliability that can only be offered by experts in the field of raised flooring supports, the NM pedestal is regularly selected and widely appreciated Internationally within the building industry. When installed on a slopping surface, shims or the slope compensator can be placed on the pedestal head to ensure a level support surface. The slope compensator can add up to 1% of slope.

Features:

- Bi-material head offers anti-noise and anti-slip
- Made from 100% recycled material
- Removable spacer tabs
- Smooth base with pre-cut lines
- Resistant to weathering, acids, UV rays, and wear and tear
- Resistant to temperatures ranging from -40F to 248F

Specs:

- Base Diameter: 8"
- Head Diameter: 6"
- Tab Height: 1/2"
- Tab Width: 5/32"
- Load Capacity: 3,300 lbs

The NM Extension is utilized when heights surpass the maximum height of the NM-5 pedestal (10.63"). Each extension will add up to 5.7" to the overall height of the pedestal being installed.

For more technical information, visit www.mrpsupports.com

Aqua Mix low and no VOC (volatile organic compounds) products emit only a low amount of VOC's or none at all, helping to provide better indoor and outdoor air quality compared to similar products. Aqua Mix has offered low and no VOC sealers for many years, and now these sealers are part of Custom Building Products' BuildGreen® program and earn points toward LEED (Leadership in Energy and Environmental Design) certification.

Aqua Mix's biodegradable cleaners (Concentrated Stone & Tile Cleaner, Stone Deep Clean, and Grout Deep Clean) are designed to break down quickly and naturally in the environment. These upgraded formulas provide the quality performance and commitment to more environmentally responsible products that Aqua Mix customers have come to expect.

Bringing customers innovative products that work in specialized situations is possible because of our forward-thinking scientific team that introduced formulas containing ingredients with NanoSTG, X2, and Polycure technologies that exceed expectations for product performance.

The beauty of tile lies on more than just the surface. Tile is a timelessly popular surfacing choice thanks to its durability and cleanability. Whether used on floors, walls or countertops, tile needs minimal maintenance to keep it looking great for years. Always follow manufacturer's recommendations for your particular tile or stone installation.

Routine Cleaning

Floors

Simple daily cleaning is all it takes to keep tiled floors in their prime. Here are some quick ways to care for tile floors:

- Sweep, vacuum or dust-mop floors regularly to remove gritty particles.
- Gently remove any stuck-on debris with a putty knife or nylon scouring pad.
- Damp-mop with routine cleaners such as **Bona Floor Cleaning Products**.
- Allow to dry, or if the tile's finish is highly polished, wipe dry to avoid water spots.

Important tips for maintaining tile and stone floors:

- Never use abrasive cleaners. Like tracked-in dirt, they may dull a shiny finish. If not using a professionally suggested product, carefully check the product labels to make sure they do not contain abrasives that may discolor grout or scratch the surface of natural stone tiles.
- Avoid acidic cleaners, as they may harm grout or natural stone surfaces with prolonged exposure.
- Heavily soiled or neglected floors may require the use of a wide selection of products, depending on the problem. Refer to the following pages for the best products to use for your situation.
- Place a mat outside each door and a rug just inside to collect dirt before it gets onto the floor.
- It is recommended to seal light-colored grouts to reduce ongoing maintenance and porosity.
- It is recommended to seal all natural stone to maintain its beauty.
- General household cleaners are not suitable for most tile and stone surfaces.

Walls

Tile walls are typically installed in bathrooms and kitchens, where we often use abrasive household cleaners. A basic rule of thumb is to always avoid abrasive cleaners when maintaining tiled walls. Abrasive cleaners may dull a glossy tile's finish, creating a rough surface that will actually attract soap scum and grime.

Important tips for maintaining tile walls:

- In the bathroom, clean the wall surface with a sponge and a non-abrasive routine cleaner.
- Hard water stains can be removed easily with **Phosphoric Acid Substitute**.
- In the kitchen, a regular and thorough wiping with a routine cleaner such as **Bona Floor Cleaning Products** will keep tile backsplashes and walls spotless.

Countertops

Tile's durable beauty makes it an excellent surface choice for countertops and will survive years of use with style. As with other surfaces, simply avoid abrasive cleansers and clean up spills immediately. To remove a dried spill, use a sponge, hot water and a routine or stain specific cleaner. Most stains can be removed with a nylon-bristle brush or nylon-scouring pad. Also, as food may come in contact with your countertop, make sure the cleaner you use does not leave a harmful residue.

Deep Cleaning

For high traffic areas or when tile has been neglected for a long time, intensive cleaning may be required. Glazed wall tile should be cleaned with a non-metallic pad, warm water and a scouring powder. Care should be exercised to not use cleaners that contain colored dyes or bleach, as they may alter the appearance of the grout color. In common areas, a heavy duty cleaner such as Heavy Duty Tile & Grout Cleaner will provide excellent results.

DO

Blot up spills immediately.

Dust mop floors using an untreated dust mop.

Use door mats and walk-off mats wherever possible. This will help keep dirt and grit off the floor.

Damp mop floors regularly using a neutral cleaner formulated to clean tile or stone.

Keep planter containers up off the surfaces of tile or stone. This can be achieved by using container stands that allow air circulation under the containers.

Remove felt from the bottom of knickknacks. The dye in the felt may eventually cause staining. Felt can be replaced with clear plastic self-adhesive tape to protect from scratching.

Always use pH-neutral cleaners as acid-based cleaners may damage both tile and grout.

Use a cleaner specifically made for your particular tile or stone.

DON'T

Do not use vinegar or cleaners that contain acids such as tile, tub, toilet and grout cleaners.

Do not use powder cleansers, soft cream cleansers, mildew/mold removers or disinfectants.

Never mix bleach or ammonia with any other cleaning fluid.

Do not use abrasive nylon scrub pads or harsh cleaning agents. These can scratch or damage the surface of the tile or stone.

Do not use furniture polish. This will help minimize staining and etching on furniture, counters and vanities.

Do not use cork and wood container protectors. These can cause severe stains.

Cleaners

The advantages of Aqua Mix cleaners:

- Specifically formulated to be part of the perfect routine or heavy-duty cleaning solution for any stone, tile, or grout surface
- Safely remove stains, dirt, and grease
- Restore the appearance of neglected or heavy use areas

General purpose, acid based cleaners, especially those containing lemon, acid, bleach or vinegar can visibly damage or etch the tile or stone surface.

Aqua Mix routine cleaners are non-acidic and won't damage stone, tile, or grout.

Many AquaMix cleaners are designed to break down quickly and naturally in the environment.

Heavy-Duty Cleaners

Aqua Mix heavy-duty cleaners that contain alkali are ideal for special circumstances requiring deep cleaning.

Grout Deep Clean

Removes grease, food stains, soap scum, hard water deposits, and dirt and soil from grout joints. *Special Order Item - 2 week lead time. No additional freight applies.*

AquaShield™ Cleaner & Resealer

Removes grease, dirt, food, and soap scum. Inhibits growth of mold and mildew.

Heavy Duty Tile & Grout Cleaner

Effectively removes grease, soap scum, body oil, mildew stains, and algae. *Quart size In Stock.*

1&2 Deep Clean

Highly concentrated, industrial strength, 2-part cleaner and degreaser. *Special Order Item - 2 week lead time. No additional freight applies.*
