For your convenience, the products shown in this catalog are all stocked in our Central Service Center. (Orders placed before 12pm are available within 1 business day for MD, VA, and Raleigh NC locations. Greensboro NC ships within 48 hours.)

The TCNA recommends rectangular shape tile be installed with a maximum of 33% offset in order to resolve any possible lippage from one tile to the next.
Please Note: Due to its linear plank shape, this material requires particular care when it comes to installation. The tile will look its best when offset is less than 33%. The staggered installation will minimize lippage which is common in tiles of this format. No claim will be honored after installation.

Please Note: It is recommended that only standard unsanded grout be used with the darker color wall tiles. Power Grout has the potential to leave scratches in the glazing of those colors.
Please Note: Due to its linear plank shape, this material requires particular care when it comes to installation. The tile will look its best when offset is less than 33%. The staggered installation will minimize lippage which is common in tiles of this format. No claim will be honored after installation.

*Limited inventory on 8x32 only – Please check availability.

ADJUSTABLE PEDESTALS

FOR RAISED INSTALLATION

A wide range of features such as the noise-reducing rubber head, the Adjustment Key, a wide range of adjustable heights and the pre-cut base for wall corner cuts, make the NM pedestal perfect for any kind of raised flooring applications. Featuring an above average loading capacity and a reliability that can only be offered by experts in the field of raised flooring supports, the NM pedestal is regularly selected and widely appreciated internationally within the building industry. When installed on a sloping surface, shims or the slope compensator can be placed on the pedestal head to ensure a level support surface. The slope compensator can add up to 1% of slope.

Features:
• Bi-material head offers anti-noise and anti-slip
• Made from 100% recycled material
• Removable spacer tabs
• Smooth base with pre-cut lines
• Resistant to weathering, acids, UV rays, and wear and tear
• Resistant to temperatures ranging from -40F to 248F

Specs:
• Base Diameter: 8”
• Head Diameter: 6”
• Tab Height: 1/2”
• Tab Width: 5/32”
• Load Capacity: 3,300 lbs

NM-1
1" - 1.57” (25-40 mm)

NM-2
1.57” - 2.75” (40-70 mm)

NM-3
2.36” - 3.93” (60-100 mm)

NM-4
3.54” - 6.30” (90-160 mm)

NM-5
5.90” - 10.63” (150-270 mm)

The NM Extension is utilized when heights surpass the maximum height of the NM-5 pedestal (10.63”). Each extension will add up to 5.7” to the overall height of the pedestal being installed.

For more technical information, visit www.mrpsupports.com
The beauty of tile lies on more than just the surface. Tile is a timelessly popular surfacing choice thanks to its durability and cleanability. Whether used on floors, walls or countertops, tile needs minimal maintenance to keep it looking great for years. Always follow manufacturer’s recommendations for your particular tile or stone installation.

Routine Cleaning

Simple daily cleaning is all it takes to keep tiled floors in their prime. Here are some quick ways to care for tile floors:

- **DO**
  - Use a cleaner specifically made for your particular tile or stone.
  - Always use pH-neutral cleaners as acid-based cleaners may etch the tile or stone surface.
  - Use a biodegradable cleaner that cleans and deodorizes kitchen and bathrooms.
  - Avoid acidic cleaners, as they may harm grout or natural stone surfaces with prolonged exposure.

- **DON’T**
  - Do not use vinegar or cleaners that contain acids such as tile, tub, toilet and grout cleaners.
  - Do not use powder cleansers, soft cream cleansers, mildew/mold removers or disinfectants.
  - Do not use cork and wood container protectors. These can scratch or damage the surface of the tile or stone.
  - Never mix bleach or ammonia with any other cleaning fluid.

**Floor Care**

Flooring is a key component of any space, and proper care is essential to maintaining its beauty and longevity. Here are some tips to help you keep your tile floors looking their best:

- **General Tips**
  - Sweep, vacuum or dust-mop floors regularly to remove gritty particles.
  - Gently remove any stuck-on debris with a putty knife or nylon scouring pad.
  - Damp-mop with routine cleaners such as AquaKleen®.
  - Allow to dry, or if the tile’s finish is highly polished, wipe dry to avoid water spots.

- **Specific Instructions**
  - **Floors**
    - Routine Cleaning
      - Sweep, vacuum or dust-mop floors regularly to remove gritty particles.
      - Gently remove any stuck-on debris with a putty knife or nylon scouring pad.
      - Damp-mop with routine cleaners such as AquaKleen®.
      - Allow to dry, or if the tile’s finish is highly polished, wipe dry to avoid water spots.

- **Walls**
  - Walls are typically installed in bathrooms and kitchens, where we often use abrasive household cleaners. A basic rule of thumb is to avoid abrasive cleaners when maintaining tiled walls. Abrasive cleaners may dull a glossy tile’s finish, creating a rough surface that will actually attract soap scum and grime.

**Countertops**

Countertops are a surface that covering your countertops and will survive years of use with style. As with other surfaces, simply avoid abrasive cleansers and clean up spills immediately. To remove a dried spill, use a sponge, hot water and a routine or stain specific cleaner. Most stains can be removed with a nylon-bristle brush or nylon-scouring pad. Also, as food may come in contact with your countertop, make sure the cleaner you use does not leave a harmful residue.

**Walls**

Walls are typically installed in bathrooms and kitchens, where we often use abrasive household cleaners. A basic rule of thumb is to avoid abrasive cleaners when maintaining tiled walls. Abrasive cleaners may dull a glossy tile’s finish, creating a rough surface that will actually attract soap scum and grime.

**Important Tips for Maintaining Tile and Stone Floors**

- Never use abrasive cleaners. Like tracked-in dirt, they may dull a shiny finish. If not using a professionally suggested product, carefully check the product labels to make sure they do not contain abrasives that may discolor grout or scratch the surface of natural stone tiles.
- Avoid acidic cleaners, as they may harm grout or natural stone surfaces with prolonged exposure.
- Heavily soiled or neglected floors may require the use of a wide selection of products, depending on the problem. Refer to the following pages for the best products to use for your situation.
- Place a mat outside each door and a rug just inside to collect dirt before it gets onto the floor.
- It is recommended to seal light-colored grouts to reduce ongoing maintenance and porosity.
- It is recommended to seal all natural stone to maintain its beauty.
- General household cleaners are not suitable for most tile and stone surfaces.
